

PRESSURE TESTER

Bottle / can pressure tester

The Pressure Tester is designed to facilitate measurement of bottle or can pressure.

A bottle/can is placed in the centre of the device, the piercing mechanism and pressure gauge is lowered and fixed into position and the lever pulled.

The plunger pierces the lid allowing the pressure to register on the pressure gauge.

Features:

- Easy to operate
- No special utility requirements necessary
- Sized for bottles/cans up to 120mm diam x 330mm high
- Easy to read pressure gauge (analogue and digital versions available) measurements in psi, bar or Mpa.
